INDOOR/OUTDOOR
COLLECTION

When you see this symbol the range will have an indoor and an outdoor (20mm) coordinating tile. Please see Outdoor Brochure for details.

HOMESTYLE
COLLECTION

Our Homestyle collection is a stylish yet affordable series of products for more economically driven projects. When you see this symbol, the range will be more cost effective overall.

Great news for bathroom designers! Our products will be available on Virtual Worlds from summer 2023.

Please ask for further details.

The Tile Collection 2023/24

BATHROOM CONCEPTS

This innovative collection of fashionable, decorative and feature bathroom tiles will enable you to be as creative as you like.

There are lots of new ranges to discover including Assen, Bowland, Dagobah, Capitol, Dual, Land, Travertino, Bosco, Capri, Viena and more.

These are ceramic wall tiles with coordinating porcelain or vitrified ceramic floor tiles, creating the perfect bathroom concept.

The Tile Collection 2023/24

WOOD EFFECT

Follow the increasingly popular trend for wood effect wall and floor tiles and explore our extensive and authentically designed collections.

A variety of shades and sizes means that there are plenty of options to suit your interior and exterior concepts.

New ranges include Forest, Marne, Northwood, Olson and Sherwood.

For other wood inspired collections, please also see Bosco (page: 31) and Eos (pages: 140 - 141).

The Tile Collection 2023/24

SMALL FORMAT KITCHEN & BATHROOM

This diverse selection of tiles will brighten up smaller spaces, whilst adding designer flair when integrating with other tiles in larger areas.

The spectrum of colours and sizes available is perfect when creating trendy herringbone features and other imaginative designs.

New ranges include Bora Bora, Mojave and Soho & Lotto.

The Tile Collection 2023/24

GENERAL INFORMATION

TILE SHADING & DIGITAL VARIATION

Modern tile production utilises high definition digital printing often replicating widely varying colours, effects and textures typically found, for example, in stones and wood. This variation cannot be fully represented in a single sample tile. Therefore please ensure the consumer is fully aware of the possible variation by viewing multiple pieces and/or a representative image prior to fixing.

The variation of colour, texture, and tone between individual ceramic and porcelain tiles is termed as colour shade variation. Variation in colour and shade is an inherent characteristic of any fired product and can actually enhance the character and beauty of the finished project.

Porcelain tiles are durable and stain resistant, but in the case of polished porcelain the credit belongs more to the tile sealer than to the tile itself. In the process of polishing porcelain, the manufacturer buffs off the top particles of the tile, giving the clay a porous surface. To protect your floor from stains and scratches, immediately seal it after installing it using a penetrating sealer. This type of sealer doesn't just sit on top of the tile, it seeps into the surface, reinforcing it from within.

We recommend a product from All For Stone called Seal Gold.

Photographic images of tiles may not always show the true colour, finish or texture of the tile itself.

Examples of extreme shading variations

FIXING ADVICE FOR OBLONG TILES ON WALLS & FLOORS

Despite the popularity of brick bond fixing in the UK, European and US tile markets, it is becoming apparent that this method of tiling is unsuitable for today's modern large format tiles. As tiles become larger it is impossible to guarantee that they will always be totally flat.

All tiles regardless of their origin are susceptible to warpage during the manufacturing process, and as a result there are tolerances in place to allow for this inherent curvature. The longer the tile the greater level of allowed curvature as the measurement is calculated in mm as a percentage of the tile's length.

Taking this information into consideration it is the view of our suppliers that we cannot endorse any installations where a brick bond fixing method has been used. We are happy to endorse stacked bond, or staggered bond where tiles are offset by no more than 30%. Where either a wall or floor tile is fixed using staggered bond, a suitable size grout joint must be used which does not exaggerate any of the inherent curvature that may be present in the product.

WHAT ARE 'PEI' RATINGS ?

PEI stands for the Porcelain and Enamel Institute.

PEI rates a glazed tile's ability to resist abrasion and its suitability as a floor tile.

This is referred to as **Wear Rating** in this brochure, where applicable.

The wear rating scale ranges from PEI 2 to PEI 5. Lower ratings (typically 2 & 3) are only suitable for light tread areas, whereas higher ratings (typically 4 & 5) are suitable for most domestic use and some commercial areas.

WHAT IS RECTIFIED?

A "Rectified" tile is a ceramic or porcelain tile that has been mechanically cut or ground down to an exact size. since it applies only to the tile's edges, it is called an edge treatment. Additionally, the edges are usually precisely cut at a square: a 90-degree angle. Rectification is not considered better than other edge treatments; it is just a different treatment that allows for a different look.

The 'R' rating or resistance level is a measure used by professionals to determine the anti slip properties of a floor tile, with R9 being the lowest rating and R12 being the highest rating.

Please Note: ●
Austral, Authority, Montego and Pulse are also available as 20mm Outdoor Pavers with an R11 anti-slip rating. Please refer to our Outdoor Brochure for details.
